The hint below each prompt tells you exactly when and how to use it. Follow the hint — it is based on what actually worked for 1,400+ students.

Start with the category that matches your current workflow stage. If you are doing outreach first, start with Client Outreach. If you are building content, go to Content Creation.

Prompts are tool-agnostic unless stated. Most work in any AI chat interface. Some reference specific tools (Canva, CapCut, ElevenLabs) — use the free tier.

Write a 4-part storytelling sales copy for [product] for [audience]. Part 1: the hero (your customer). Part 2: the villain (their problem). Part 3: the guide (you + product). Part 4: the plan (how they succeed).

Story-driven sales copy converts 2-3x better than feature lists.

15 Before/after copy block

Before/after is the most persuasive copy structure.

Honest comparisons build trust even when biased.

18 Bonuses section copy

Write a 'bonuses' section for [product] that makes the bonuses feel more valuable than the product. For each bonus: name, one-line value proposition, and perceived value.

Bonuses should feel like 'too much' — that's the point.

19 Testimonial rewrite

Take this raw testimonial: '[raw testimonial]'. Rewrite it to be more persuasive: keep the voice, add specifics, structure it as problem → solution → result. Keep it under 60 words.

A well-edited testimonial is worth 10x the raw version.

About pages are the most-read page after the homepage.

Value stacking makes any price feel like a steal.

Short sales letters respect the reader's time and convert better.

Write a '10-point checklist for [topic]' for [audience]. Each point: a short, actionable item. Frame it as: 'Before you [action], run through this checklist.' End with a CTA to [product] for the full system.

Checklists are high-value, low-commitment content.

28 Objection reframing

I hear this objection: [objection]. Reframe it as a reason to buy. Use the 'That's exactly why you should' technique. Provide 3 different reframes, each with a different angle.

Service pages sell the outcome + de-risk the process.

Waitlists create scarcity before launch.

05 Landing page — freebie/opt-in

Freebies trade value for an email — make it worth it.

Write a 'how it works' section for [product] for [audience]. 3 simple steps. Each step: a number, a short title, and a 1-sentence explanation. Keep it so simple a 5th grader gets it.

11 Landing page — pricing section

The headline is the most tested element on any page.

The subheadline is often the deciding factor.

18 Landing page — guarantee section

Write a guarantee section for [product] for [audience]. Make it strong, specific, and confident. Include: what's guaranteed, the timeframe, what happens if they're not satisfied, and why you can afford to offer it.

A strong guarantee increases conversion more than it costs.

19 Landing page — bonus section

Write a bonus section for [product] for [audience]. List 3 bonuses, each with: name, value (\$), and a one-line description of what they get. Make the total bonus value at least 3x the product price.
